

Nimbus Cloud Storage - Internal Employee Handbook (2026 Edition)

Section 1: Company Overview

Nimbus Cloud Storage was founded in 2019 by Priya Ranganathan and Tomas Vireno. The company's headquarters is located in Boulder, Colorado. Nimbus provides encrypted file-sync services to small businesses, and as of the 2026 fiscal year the company has 342 employees across three offices: Boulder, Lisbon, and Chennai.

The company's flagship product is called DriftSync. DriftSync was first launched in March 2021 and now stores over 9 petabytes of customer data. The current DriftSync version, as of this handbook's publication, is version 4.7, codenamed "Marmot."

Section 2: Leave Policy

Full-time employees at Nimbus Cloud Storage accrue 22 days of paid vacation per year, plus 10 company holidays. Vacation days accrue at a rate of 1.83 days per month and can be carried over into the following year up to a maximum of 10 unused days. Sick leave is separate from vacation and is granted as a lump sum of 12 days at the start of each calendar year, non-carryover.

Parental leave at Nimbus is 16 weeks fully paid for the primary caregiver and 8 weeks fully paid for the secondary caregiver, regardless of the employee's country of employment. This policy was updated in January 2025; before that date, parental leave was 12 weeks for primary caregivers.

Section 3: Remote Work Policy

Nimbus operates on a "Flex-3" hybrid policy: employees are required to be in their assigned office at least 3 days per week, with Tuesday and Thursday designated as mandatory in-office days company-wide. The third in-office day can be chosen freely by the employee. Fully remote work is only permitted for employees on the Customer Success team who live more than 90 miles from an office.

Section 4: Expense Reimbursement

Employees can expense up to \$75 per month toward home internet costs if they work remotely at least one day per week. Travel expense reports must be submitted within 21 days of the trip's end date using the internal tool named "Voucher." Reports submitted after 21 days require a manager's written exception approval, and reports submitted after 60 days are automatically rejected by the system with no exceptions.

Section 5: Performance Review Cycle

Nimbus runs performance reviews twice per year, in April and October. Each review cycle consists of a self-assessment, a peer-feedback round (minimum 3 peers, maximum 6), and a manager evaluation. Ratings use a 5-point scale where a rating of 3 is defined internally as "Consistently Meets Expectations." Employees who receive a rating of 4 or 5 in both cycles of a calendar year are automatically eligible for the "Nimbus Fast Track" promotion review, which happens outside the normal promotion cycle.

Section 6: Security & Data Handling

All Nimbus laptops are encrypted using the internal tool "Cryovault," and every employee must rotate their Cryovault passphrase every 90 days. Customer data on DriftSync servers is encrypted at rest using AES-256 and in transit using TLS 1.3. Any suspected security incident must be reported to the security team within 4 hours of discovery via the internal incident channel

named "#nimbus-flare."

Section 7: Internal Tools Glossary

- Voucher: the internal expense reimbursement tool.
- Cryovault: the internal disk-encryption and passphrase management tool.
- DriftSync: Nimbus's flagship customer-facing file-sync product.
- #nimbus-flare: the internal incident-reporting Slack channel.
- Fast Track: the accelerated promotion review path for high performers.

Section 8: Office Locations & Amenities

The Boulder headquarters occupies the 4th and 5th floors of the Pearl Street Commons building and includes an on-site gym validated for use before 9am and after 6pm on weekdays. The Lisbon office, opened in 2022, is Nimbus's smallest office at 28 employees and is located in the Alameda district. The Chennai office, opened in 2023, handles the majority of DriftSync's backend infrastructure engineering and has the largest headcount of the three offices at 168 employees.
